---

PROFILE

Data Science and Machine Learning enthusiast with hands-on experience in Python, SQL, Pandas, NumPy, Scikit-learn, and exploratory data analysis. Experienced in developing machine learning models, analyzing datasets, and extracting insights
through data visualization. Strong foundation in statistics, linear algebra, NLP, and deep learning, with a focus on applying machine learning techniques to real-world pr

---

EDUCATION

Bachelor of Information Technology | Lincoln University College, Malaysia 2022-2026

PROJECTS

Mental state Classification(ML model)

- The main objective of this project is to develop a machine learning-based system that can analyze and classify the mental state of users based on the statements provided by them.
- Data Engineering & ELT Workflow
- Technology used: python, pandas, numpy, scikit-learn and NLP
- Github: https://github.com/therai0/mental_status_analysis
- Project demo: https://raibhaskar.com.np/projects/MentalHealthProject

Predicting student health risk(Data analysis):

- The main goal of this project to analysis the different features which determine the student health condition. In this project I have explore all types of features to find the insight and relation with target variable.
- Technology used: python,pandas,matplotlib, seaborn, and scikit-learn.
- Github : https://github.com/therai0/Predicting_Student_Health_Risk

---

TECHNICAL SKILLS

- Language and Libraries: **sql**,**python, pandas, numpy,seaborn,matplotlib, scikit-learn,pytorch.**
- Concepts: **Machine learning(supervise,unsupervise,reinforcement),NLP ,Deep learning, Statistics, Calculus, Linear Algebra.**

CERTIFICATION:

- Complete data science course Udemy, Krish naik Completed
- AI/ML ,Data science course. Apna College 2026,April - Present
